

This questionnaire is part of the Digi-Sporting European project, which aims to increase the knowledge about the use of new technologies in sports clubs and to create training tools for their improvement.

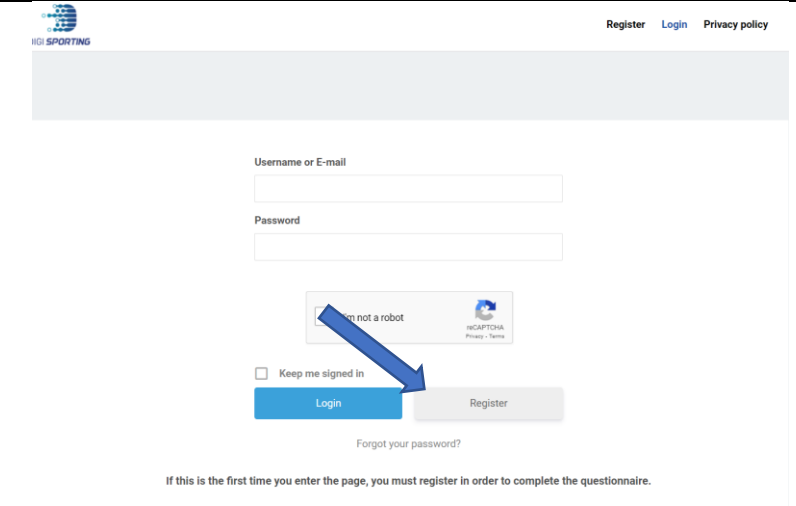

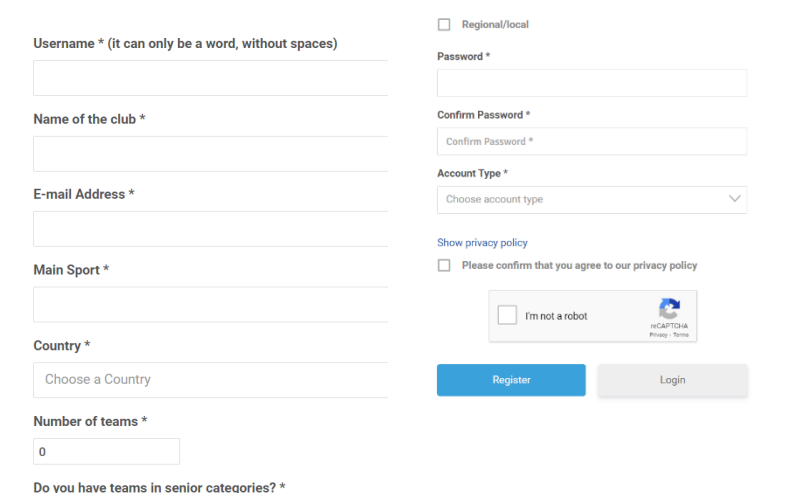

In this case, we request your collaboration to know the level of development and use of different technologies in sports clubs. To do this, we need you to fill out a simple online questionnaire.

The results of this questionnaire will be anonymous and will only be published cumulatively with the responses of the other clubs, in the form of the average or similar values. Therefore, it is absolutely necessary that you respond fully adjusting to reality. The questions are divided into five technological areas. If you have any questions when answering, please do not hesitate to contact us via the following e-mail: info@igoidsportec.com

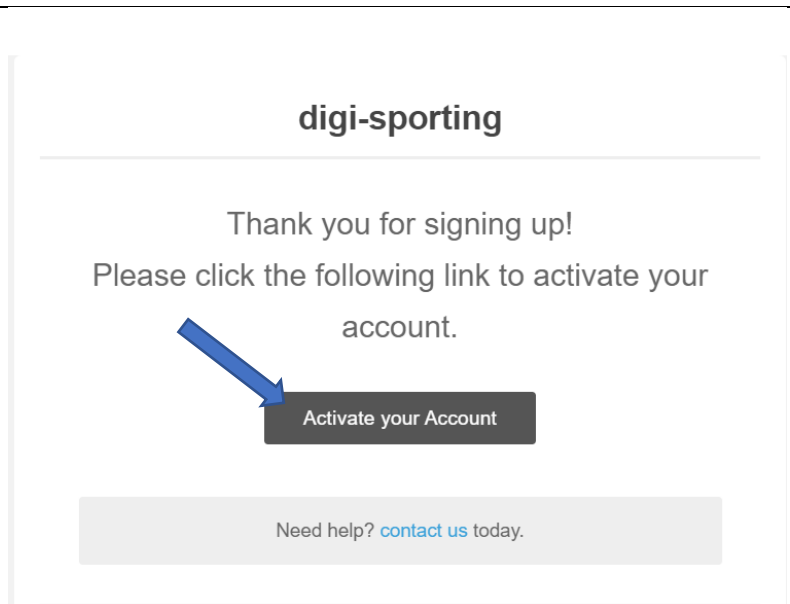

When you finish the questionnaire, you will get a score that will allow you to know the use of technology and the possible lines of development in your club.

Next, we are going to show you the steps to fill out the questionnaire. It will do everything from this link to the digi-sporting platform: <http://digi-sporting.cs.ucy.ac.cy/>

1. REGISTER

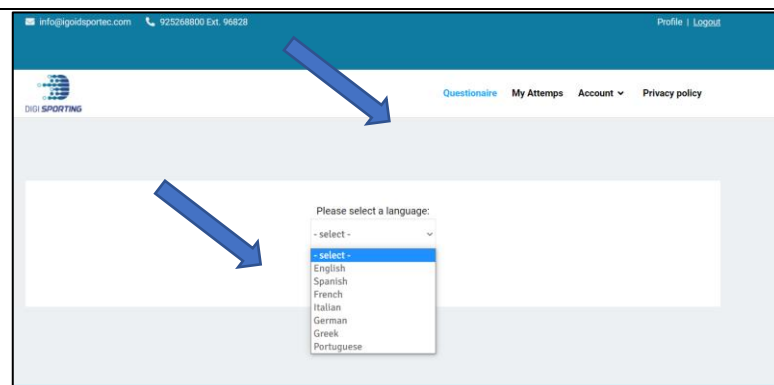

<p>Press the register button if it is the first time you enter the platform, to create the account</p>	
<p>Fill in all the fields and press "register" again (You must remember to confirm, check, the privacy policy in order to complete the registration)</p>	

You will receive an email to the address provided, in order to verify your account. PLEASE. Check the spam / junk folder if you don't get it to the main folder.

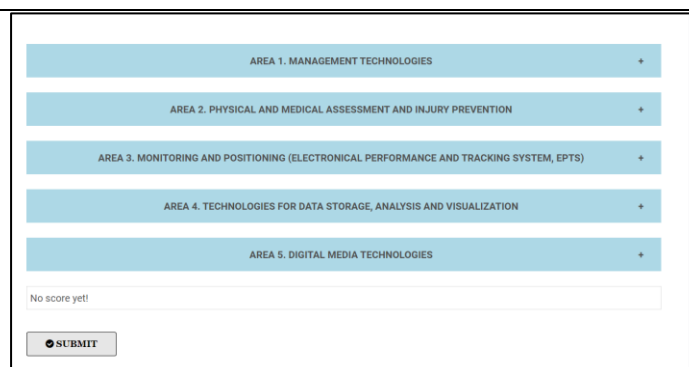

2. FULLFILL THE QUESTIONNAIRE

Once you activate the account, you will go directly to the home screen of the questionnaire (or, you can re-enter the link <http://digi-sporting.cs.ucy.ac.cy/> and enter the email and password with the ones you registered).

Select the language you want. The questionnaire will be translated to make it easier for you to fill it out properly.

The questionnaire is made up of 5 sections. Each one is a drop-down where you will find the questions.

You must answer each question with the situation that is

closest to the reality of your club (remember to be as realistic as possible).

Once you complete all the questions, press "submit".

AREA 1. MANAGEMENT TECHNOLOGIES

1. **General use of club management software and utilities.** Refers to specific software for sports clubs or similar entities that helps to automate and manage items such as player chips, competition tracking or sports planning.

- No software is used or known for any function related to club management
- The use of software that includes utilities related to club administration has been evaluated and studied
- Some software related to club management is used in isolation, or has been used a few times
- Some software related to club administration is used continuously
- Some software related to club administration is used continuously, integrating other utilities such as scouting, medical service or training

2. **Use of software for sports management and scouting.** This refers to specific software, or complements to a general software, of applications with utilities for player ratings, help for scouts, player databases, etc.

- No software is used or known for any scouting function
- The use of software that includes scouting-related utilities has been evaluated and studied
- Scouting-related software is used, or has been used a few times, in isolation
- Some scouting-related software is used continuously
- Some scouting-related software is used continuously, and that software is integrated into the club's comprehensive digital management platform (platform that includes and links several areas of the club)

After that, you can see your score in "My Attempts" page.
